SYLLABUS
CORE 7007 OMS III Psychiatry
11 CREDIT HOURS

Course Directors:

Robert J. Coppola, D.O., M.S., ABONP
rcoppola@atsu.edu
Course Description
The psychiatry OMS III year clerkship is designed to provide the student with a brief, yet in-depth, experience of psychiatry through the integration of the basic and clinical sciences. To achieve such an understanding, didactic material provided through the clinical presentation model will complement the clinical experience gained from working with the preceptors. Students will receive exposure to patients in both ambulatory and inpatient settings as appropriate during the course of the clerkship.

This clerkship must be:
1. Under the direction of a preceptor who is either board certified or board eligible in either American Osteopathic Board of Neurology and Psychiatry (D.O.) or American Board of Psychiatry and Neurology (M.D.).
2. The preceptor's practice, outpatient, inpatient, or some combination thereof, must be of preponderantly adult medical psychiatry cases.

Procedures
All procedures are to be entered in to E*Value, and supervised and evaluated by your preceptor.
During the Psychiatry Clerkship, students are expected to develop their competencies in many basic clinical skills. While not every skill listed below can be performed during this brief rotation, the student should avail him/herself of as many of the following procedures as possible, and seek out opportunities to perform these skills in other rotations as well.

- Mini Mental Status Examination
- Complete Mental Status Examination
- Adult Suicide Risk Assessment
- Adolescent Suicide Risk
- Create a community-based treatment plan
- Write an assessment of readiness for discharge plan

Clinical Supplemental Reading Assignments:
Designed to supplement contextual learning (patient encounters), you will also find recommended text reading that support the management skills for the clinical presentations listed. Didactic material and specific learning objectives are provided by the course director (see recommended textbooks). The learning objectives are designed to guide the student's independent study of the assigned material. The supplemental suggested readings and references are to be used at the student's discretion and, like the Blackboard Mind course suggestions, are optional. Use your personal judgment and the suggestions from your preceptor as to the extent to which these resources are utilized.

Textbooks:
Required

First Aid for the Psychiatry Clerkship, 3rd edition
Authors: Latha Stead, Matthew Kaufman, and Jason Yanofski
Publisher: McGraw-Hill Medical; 4th Edition
List Price: $39.91 on Amazon
Note: Available on-line and free through the A.T. Still Memorial Library (Arizona Catalog)

Recommended

Introductory Textbook of Psychiatry
Authors: Donald W. Black and Nancy C. Andreasen
Publisher: Amer Psychiatric Pub; 6th Edition
List Price: $70.59 on Amazon
Note: Available on-line and free through the A.T. Still Memorial Library (Arizona Catalog)
Curricular Domain Objectives:
The objectives are intended to be a guide for the student's learning activities and serve as a baseline for assessment of the student's enhanced knowledge, skills, and professional behavior. Not all of the objectives listed below will be encountered during any single rotation. While each student is expected to further expand his/her knowledge base and to care for all assigned patient cases, he/she is also expected to avail him/herself of the SOMA educational materials provided. Each Objectives category below, maps to the corresponding evaluation categories and competencies on the course Clinical Rotation Evaluation (CRE) and coursework assignments.

Students will refer to individual schemes and review the associated learning objectives and learning activities associated with each. These are found under separate tab on Blackboard9.1.

I. Osteopathic Principles and Practices (OPP)
Graduates must demonstrate knowledge of osteopathic principles and practice (OPP), and they must exhibit and apply knowledge of somatic dysfunction diagnosis and osteopathic manipulative treatment (OMT) in clinical settings.

1. Demonstrate and communicate knowledge of a.) OPP; b.) the basic science, mechanisms of action, and physical findings of somatic dysfunction; and c.) the mechanism of action, indications and contraindications, and basic application of OMT.

2. Perform and document a complete and appropriately focused structural examination in a respectful, logical and organized manner.

3. Apply osteopathic principles and OMT into an appropriate patient care plan.

4. Demonstrate sufficient depth of knowledge and skills to integrate osteopathic principles and practice into all aspects of whole person healthcare.

II. Clinical Skills & Osteopathic Patient Care (CS)
Graduates must demonstrate effective use of motor and cognitive skills in diagnosis, management and prevention of common health problems encountered in patient care within a variety of clinical settings and across the lifespan.

1. Elicit a comprehensive and appropriately focused history and generate a list of a patient’s concerns in a respectful, rationale and organize manner.

2. Perform a complete & appropriately focused physical examination in a respectful, rationale and organized manner; and correlate abnormal findings to clinical presentations and disease processes.

3. Perform basic clinical procedures essential for general osteopathic medical practice.

4. Utilize clinical reasoning strategies to accurately diagnose medical conditions originating from common clinical presentations.

5. Determine and implement evidence-based clinical intervention plans and management strategies, while monitoring their effectiveness and adjusting appropriately.

6. Incorporate health education counseling, preventive medicine approaches, and health promotion strategies during patient encounters.

III. Medical Knowledge (MK)
Graduates must demonstrate knowledge and application of osteopathic, biomedical, clinical, epidemiological, biomechanical, social and behavioral sciences in the context of patient-centered care.

1. Recognize and explain normal structure and function across the lifespan.

2. Identify and explain the molecular, biochemical and cellular mechanisms that support normal structure and function.
3. Distinguish between the mechanisms of disease pathogenesis, describe their impact on the body, and relate them to patient signs and symptoms.

4. Explain and apply principles of contemporary therapeutics, including osteopathic, surgical, pharmacologic, molecular, biologic, behavioral and contemporary/alternative.

5. Interpret diagnostic studies and correlate abnormal findings to disease states.

6. Describe the epidemiology of common disease states within a defined population, and the systematic approaches useful in reducing the incidence and prevalence of those disease states.

IV. **Professionalism (P)**

   Graduates must demonstrate through knowledge, behavior and attitudes, a commitment to the highest standards of competence, ethics, integrity, and accountability to patients, society and the osteopathic profession.

   1. Demonstrate respect, altruism, compassion, interest, integrity, honesty, accountability and trustworthiness in all interactions with patients, their families, faculty, staff, peers and colleagues.

   2. Apply ethical decision making in all aspects of professional practice.

   3. Demonstrate awareness, sensitivity and responsiveness to culture, socio-economic status, religion, age, gender, sexual orientation, and mental/physical disabilities of patients, their families, faculty, staff, peers and colleagues.

   4. Demonstrate professional work behaviors such as punctuality, appropriate appearance, accepting responsibility for errors, and maintaining professional boundaries.

   5. Demonstrate a commitment to continuous professional development, learning, and internal & external assessment.

V. **Interpersonal and Communication Skills (ICS)**

   Graduates must demonstrate the knowledge, behaviors and attitudes that facilitate accurate and efficient information gathering, empathetic rapport building, and effective information giving in interactions with patients, their families and colleagues of the inter-professional health care team.

   1. Document and record patient information in an accurate, organized, and confidential manner appropriate to the clinical situation and present relevant aspects of a patient’s case in a logical, articulate fashion both orally and in writing.

   2. Work effectively and collaboratively with patients, their families and colleagues of the inter-professional healthcare team in providing whole person healthcare.

   3. Demonstrate effective and appropriate active listening, verbal, non-verbal, and written and electronic communication skills when dealing with patients, their families, faculty, staff, peers and colleagues of the inter-professional health care team.

VI. **Practice-Based Learning and Improvement (PBL)**

   Graduates must demonstrate the ability to apply scientific theory and methodology and exhibit the critical thinking skills essential for integrating evidence-based principles and practice into patient care.

   1. Apply fundamental biostatistical and epidemiologic concepts to practice-based learning and improvement.

   2. Conduct a systematic review of literature on basic and clinical science research and critically synthesize the results for relevance and validity.

   3. Describe the clinical significance of and apply strategies for integrating best medical evidence into clinical practice.
4. Identify, describe and apply systematic methods relating to continuous evaluation of osteopathic clinical practice patterns, practice-base improvements, and the reduction of medical errors.

5. Integrate technology into the practice of medicine and the delivery of healthcare services.

VII. **Systems-Based Practice (SBP)**
Graduates must demonstrate awareness of and responsiveness to the larger context and systems of health care, and effectively identify system resources to advocate for and maximize the health of the individual and the community or population at large.

1. Demonstrate knowledge of health delivery systems that affect the practice of an osteopathic physician and how delivery systems influence the utilization of resources and access to health care.

2. Demonstrate knowledge of how patient care and professional practices affect other health care professionals, health care organizations, and society.

3. Demonstrate the ability to work effectively in a variety of health care systems (with an emphasis on community health care) and provide quality patient care while advocating for the best interests of patients.

4. Demonstrate the ability to implement safe, effective, timely, patient-centered and equitable systems of care in a team-oriented environment.
Course Assignments/Grading:

Clinical Rotation Evaluation (CRE) is worth 40%, COMAT is worth 40%, and weekly assignments* are worth 20% of overall grade.

* Weekly assignments / quizzes are due by midnight on Sunday each week. Failure to submit the weekly quiz on time will result in the grade for that assignment being lowered one level. Any assignment or quiz submitted more than 1 week past the due date will result in a zero for that assignment.

Course work = 0 – 5 points
> 4.75 = Honors
4.0-4.75 = High Pass
3.0-3.9 = Pass
2.1-2.9 = Low Pass
≤ 2.0 = Fail

CRE = 0 - 5 points
> 4.75 = Honors
4.0-4.75 = High Pass
3.0-3.9 = Pass
2.1-2.9 = Low Pass
≤ 2.0 = Fail

COMAT = 0 – 5 points (to convert the standard score to a 5-point scale, use rubric)
> 1.0 D above national mean = Honors: 111+
0.1-0.99 SD above national mean = High Pass: 103 – 110
National mean to 0.99 SD below national mean = Pass: 94 – 102
1.0 below to 1.5 SD below national mean = Low Pass: 85 – 93
more than 1.5 SD below national mean = Fail: 84 or lower

Please review and complete the weekly material assigned below; complete the weekly quizzes, the scores of which will be compiled to create a score that will apply to this part of your Final Course Grade. (Week one thru week three quizzes = 20% of the grade each; week four = 40% of the grade)

Week One – 8 hours MK 3, 4, 5
- Reading Assignments and Learning Objectives: See Blackboard
- Optional Review Mind Schemes and Videos: See Blackboard
- Complete Week One Quiz in Blackboard- 0 – 1 points
- Log 100% of patient encounters – Pass/Fail

Week Two – 8 hours MK 3, 4, 5
- Reading Assignments and Learning Objectives: See Blackboard
- Optional Review Mind Schemes and Videos: See Blackboard
- Complete Week Two Quiz in Blackboard- 0 – 1 points
- Log 100% of patient encounters – Pass/Fail

Week Three – 8 hours MK 3, 4, 5
- Reading Assignments and Learning Objectives: See Blackboard
- Optional Review Mind Schemes and Videos: See Blackboard
- Complete Week Three Quiz in Blackboard- 0 – 1 points
- Log 100% of patient encounters – Pass/Fail

Week Four – 8 hours MK 3, 4, 5, 6
• Reading Assignments and Learning Objectives: See Blackboard
• Optional Review Mind Schemes and Videos: See Blackboard
• Complete Week Four Quiz in Blackboard (This quiz includes material from all four weeks, and comprises 40% of the final grade for this part of the Psychiatry Rotation; each of the other 3 weekly quizzes comprises 20% of the grade.) 0 – 2 points
• Log 100% of patient encounters – Pass/Fail

Due by end of course
• Complete COMAT exam
  o Since the standardized COMAT examination in Psychiatry will be taken after completion of your rotation, it is suggested that you supplement your preparation for this examination by referring to the following ATSU library ebook publications:
      • This study guide has questions with detailed answer explanations.
    ▪ Exam Master and Board Vitals are also available through the library. A large number of questions with answer explanations are available through these sources as well. The library staff, including Adrienne Brodie, is available to assist you with this source.
• Complete Student Evaluation of Rotation (SER)

Library Reference Materials:
See textbooks listed above, using First Aid for the Psychiatry Clerkship ed.4 as the weekly textbook guide.

Grading:

Grade Format
All of the courses in OMS III and OMS IV are "honors", "high pass", "pass", "low pass", and "fail". In order to pass this course, you will need to complete the following:

Clinical Rotation Evaluation (CRE)
Students will need to receive a passing score on the Clinical Rotation Evaluation (CRE) for each four week course section (rotation) of the course. The CRE constitutes 40% of the overall grade.

Subject or Course Exam (COMAT)
At or near the end of the rotation, you will be required to take and pass a subject or course exam (COMAT). The content of the exam is based on clinical presentations most frequently seen on rotation. Most, if not all of these presentations were addressed in the OMS I and OMS II courses. Many of the presentations are covered in the rotation syllabus. You must receive a passing score on the COMAT Exam linked to this course to pass the course; and the score is worth 40% of the overall grade.

There is a very strong probability that some clinical presentations covered in the COMAT may not be addressed directly in the syllabus. There is a possibility that some of the clinical presentations covered in the COMAT may not have been observed during the rotation.

Course work / Weekly Assignments
Course work / Weekly Assignments will make up 20% of the overall grade.

Failures and Remediation
Students are required to repeat failed clinical rotations with a preceptor other than the initial preceptor. If the student fails a subject exam, the student must retake the subject exam as specified in the SOMA Catalog and rotation manual.
Course Requirements and Expectations:

Student Evaluation of Rotation (SER)
Submission of the Student Evaluation of Preceptor and course (SEP) is REQUIRED for completion of the course. The grade for the clerkship course will not be submitted to the registrar until the evaluation is received.

Clinical Documentation (Case Log) Requirements (PxDx)
Logging of every clinical interaction via the E*Value electronic log system is a course requirement and a professional responsibility of every student on every rotation in OMS III and OMS IV. Log information will be used to evaluate the volume and variety of student experiences. 100% of encounters must be logged. Failure to log clinical interactions will result in lowering course grade one level, and may adversely affect the student’s professionalism score for the rotation. Failure to log may also be commented upon in the Medical Student Performance Evaluation (MSPE) formerly known as the Dean’s Letter.

Course Director will review all logs, and determine if logging is 100% AND adequate in volume and variety. In the event the course director does not feel that the student has sufficient logs, the Course Director will note a failure for logs and the students overall grade will be lowered one level (i.e. the CRE,COMAT and Weekly Assignments averaged to be a "High Pass", inadequate logs reduce the overall grade to a "Pass"). Periodic audits of clinical activity compared to logs could result in serious concerns about adherence to professional responsibilities. Completion of logging 100% of patient interactions is NOT optional. Concerns about professionalism will be considered for referral to the Student Performance Committee.

Professionalism and Academic Honesty:
An essential aspect of the SOMA curriculum is the development of professional behaviors among students. SOMA considers breeches in professional conduct and/or academic honesty as serious academic deficiencies. The ATSU University Handbook (http://www.atsu.edu/student_affairs/handbook/pdfs/UniversityHandbook-2.19.14.pdf) has important information with respect to professionalism including a Code of Academic Conduct and Code of Behavioral Standards. The course director expects professional behavior and academic honesty at all times during this course.

Academic Adjustments:
The University can make accommodations for students with documented disabilities who are otherwise qualified. Students with disabilities are encouraged to contact the Disability Resources Advisor. Requests for accommodations must be made in writing to the Disability Resources Advisor. The contact information for the Disability Resources Advisor is as follows:

Disability Resources Advisor
5850 E. Still Circle
Mesa, AZ 85206
480-245-6248
krjones@atsu.edu

The Disability Resources Advisor will confer with the student and may request documentation and may refer the student for individual assessment by qualified experts. The ATSU Technical Standards and Accommodations Committee shall review any requests for accommodations. The Committee determines whether there are disabilities as protected by the Americans with Disabilities Act and/or Section 504 of the Rehabilitation Act and then decides if reasonable accommodations can be made without fundamentally altering the essential nature of the school’s program or instruction being pursued.

The Committee makes recommendations for or against accommodations to the Director - Learning & Disability Resources who then will notify the student and the appropriate faculty and staff members who have an educational
need to know. Within ten (10) days of receiving the Committee’s determination from the Director - Learning & Disability Resources a student can appeal the decision in writing to the dean of the appropriate school.

**Course Director Office Hours:**
Course directors will be electronically available to students during their office hours.
**Patient Log**

Student’s Name: ___________________ Date: __________

Each time you assess a new patient, please fill out the following information so that you can track the diagnosis of patients you are seeing. Review this log with your attending the last week of your rotation.

Changes to the Syllabus:
The syllabus for this course may change at the discretion of the course directors in consultation with and approval of Assistant/Associate Dean of Clinical Education. As a general policy, SOMA course directors alter syllabi only when absolutely necessary.

Students will be notified by the course directors or course facilitator in writing of any changes in course requirements or policies.
