**Across**

6. Cephalosporin preferred for MSSA
7. Antibiotic channel through gram neg outer membrane
8. Inhibitor combined with piperacillin
9. Peptidoglycan pentapeptide change in VRE
12. Cephalosporin side-chain that causes bleeding and alcohol reaction
13. Same as transpeptidase (abbrev.)
15. Cephalosporin active against Ps. aeruginosa
18. Drug of choice for MSSA
19. Inhibits penicillin renal tubular secretion
20. Penicillin active against Ps. aeruginosa
22. Vancomycin infusion related side effect
23. Non-beta-lactam with MSSA, MRSA, GAS and B.Frag. spectrum

**Down**

1. MRSA antibiotic not effective for pneumonia
Down

2. Severe daptomycin side effect
4. Cephalosporin active against Lyme
5. Beta-lactamase inhibitor given with ampicillin
10. VRE antibacterial that also inhibits MAO
11. Preferred oral aminopenicillin
13. Drug of choice for Group A Strep infections
14. Only beta-lactam w/ MRSA activity
16. Seeded infection from Staph. bacteremia
17. Severe penicillin adverse effect
21. Gram neg drug removal: _______ pump
