Across

3. VANCOMYCIN — Give IV for MRSA - give oral for C. diff.
6. CEFAZOLIN — Cephalosporin preferred for MSSA
7. PORIN — Antibiotic channel through gram neg outer membrane
8. TAZOBACTAM — Inhibitor combined with piperacillin
9. DLACTATE — Peptidoglycan pentapeptide change in VRE
12. MTT — Cephalosporin side-chain that causes bleeding and alcohol reaction
13. PBP — Same as transpeptidase (abbrev.)
15. CEFEPIME — Cephalosporin active against Ps. aeruginosa
18. OXACILLIN — Drug of choice for MSSA
19. PROBENECID — Inhibits penicillin renal tubular secretion
20. PIPERACILLIN — Penicillin active against Ps. aeruginosa
22. REDNECK — Vancomycin infusion related side effect
23. CLINDAMYCIN — Non-beta-lactam with MSSA, MRSA, GAS and B.Frag. spectrum
Bugs and Drugs: NMSK A
Bill Wightkin, Pharm.D., M.S.

Down

1. DAPTOMYCIN — MRSA antibiotic not effective for pneumonia
2. MYOPATHY — Severe daptomycin side effect
4. CEFTRIAXONE — Cephalosporin active against Lyme
5. SULBACTAM — Beta-lactamase inhibitor given with ampicillin
10. LINEZOLID — VRE antibacterial that also inhibits MAO
11. AMOXICILLIN — Preferred oral aminopenicillin
13. PENICILLING — Drug of choice for Group A Strep infections
14. CEFTAROLINE — Only beta-lactam w/ MRSA activity
16. ENDOCARDITIS — Seeded infection from Staph. bacteremia
17. ANAPHYLAXIS — Severe penicillin adverse effect
21. EFFLUX — Gram neg drug removal: _____ pump
