Anticoagulation Pharmacology Puzzle OMS-1
Bill Wightkin, PharmD, MS

Across
2. Fibrinolytic used for stroke
5. Pentasaccharide anticoagulant
6. Drug which reverses warfarin
10. Blocks IIb/IIIa receptors
12. Severe autoimmune reaction to heparin
13. Reverses heparin
14. Major anticoagulant adverse effect
16. Natural anticoagulant decreased early by warfarin
17. Lab test to monitor warfarin therapy

Down
1. Lab test to monitor heparin therapy
2. Blocks production of thromboxane A-2
3. Drug class for enoxaparin (abbrev.)
4. Clotting factor inactivated by rivaroxaban
5. Blood product to reverse warfarin (abbrev.)
7. Heparin works by binding to this substance
8. State where warfarin discovered
9. Inhibits platelet ADP receptor
11. Converts plasminogen to plasmin
15. Time to steady-state anticoagulation with warfarin: ____ days
