Anticoagulation Pharmacology Puzzle OMS-2
Bill Wightkin, PharmD, MS

Across

2. Tool used to prescribe alteplase
8. Available recombinant activated clotting factor for managing warfarin bleeding
10. Blood product to reverse warfarin (abbrev.)
11. Lab test to monitor heparin therapy
13. Blocks platelet PAR1 (thrombin) receptor
15. Blocks production of thromboxane A-2
17. Fibrinolytic used for stroke
18. Oral direct thrombin inhibitor
21. Strategy for managing elevated coagulation blood tests: _____ of Time
22. Lab test to monitor warfarin therapy
24. Inhibits hepatic production of prothrombin
25. Inhibits platelet ADP receptor
Anticoagulation Pharmacology Puzzle OMS-2
Bill Wightkin, PharmD, MS

Across
26. Tool used to manage IV heparin infusions
27. Drug which reverses warfarin

Down
1. Clotting factor inactivated by apixaban
3. Treatment duration for provoked DVT: ____ months
4. Surgery QA program requiring VTE prevention
5. Anticoagulant used if history of heparin allergy or clotting ADE
6. Derivative of leech anticoagulant
7. State where warfarin discovered
9. A LMWH
10. Pentasaccharide anticoagulant
11. Reverses heparin
12. Severe autoimmune reaction to heparin
14. Heparin works by binding to this substance
16. Disease prevented with warfarin use in atrial fibrillation
19. Major anticoagulant adverse effect
20. Monoclonal antibody IIb-IIIa inhibitor
23. Oral factor Xa inhibitor
