Anticoagulation Pharmacology Puzzle OMS-2
Bill Wightkin, PharmD, MS

Across
2. CHECKLIST — Tool used to prescribe alteplase
8. SEVEN — Available recombinant activated clotting factor for managing warfarin bleeding
10. FFP — Blood product to reverse warfarin (abbrev.)
11. PTT — Lab test to monitor heparin therapy
13. VORAPAXAR — Blocks platelet PAR1 (thrombin) receptor
15. ASPIRIN — Blocks production of thromboxane A-2
17. ALTEPLASE — Fibrinolytic used for stroke
18. DABIGATRAN — Oral direct thrombin inhibitor
21. TINCTURE — Strategy for managing elevated coagulation blood tests: _______ of Time
22. INR — Lab test to monitor warfarin therapy
24. WARFARIN — Inhibits hepatic production of prothrombin
25. CLOPIDOGREL — Inhibits platelet ADP receptor
Anticoagulation Pharmacology Puzzle OMS-2
Bill Wightkin, PharmD, MS

Across
26. NOMOGRAM — Tool used to manage IV heparin infusions
27. PHYTONADIONE — Drug which reverses warfarin

Down
1. TEN — Clotting factor inactivated by apixaban
3. THREE — Treatment duration for provoked DVT: _____ months
4. SCIP — Surgery QA program requiring VTE prevention
5. ARGATROBAN — Anticoagulant used if history of heparin allergy or clotting ADE
6. BIVALIRUDIN — Derivative of leech anticoagulant
7. WISCONSIN — State where warfarin discovered
9. ENOXAPARIN — A LMWH
10. FONDAPARINUX — Pentasaccharide anticoagulant
11. PROTAMINE — Reverses heparin
12. HIT — Severe autoimmune reaction to heparin
14. ANTITHROMBIN — Heparin works by binding to this substance
16. STROKE — Disease prevented with warfarin use in atrial fibrillation
19. BLEEDING — Major anticoagulant adverse effect
20. ABCIXIMAB — Monoclonal antibody IIB-IIIa inhibitor
23. RIVAROXABAN — Oral factor Xa inhibitor
