Poisons, Toxins and Antidotes
B. Wightkin, PharmD, MS

Across

4. ACETYLCLYSTEINE — Maintains or restores hepatocyte glutathione levels
5. HYDROXOCOBALAMIN — Vitamin B-12 analog for cyanide poisoning
9. THIOSULFATE — Turns cyanide to thiocyanate
12. FOMEPIZOLE — Antidote for antifreeze ingestion
14. BICARBONATE — Used to alkalinate urine: sodium __________
15. GLUCAGON — Antidote for atenolol overdose
16. DEFEROXAMINE — Antidote for iron overdose
18. PYRIDOXINE — Antidote for isoniazid overdose
19. DILTIAZEM — Overdose treated with insulin/dextrose infusion

Down

1. PHYTONADIONE — Antidote for rat poison
2. DANTROLENE — Antidote for isoflurane triggered muscle contractions
3. OCTREOTIDE — Antidote for glyburide overdose
6. ATROPINE — Blocks muscarinic effects from malathion exposure
7. FLUMazenil — Reverses respiratory depression from midazolam
8. METHEMOGLOBINEMIA — Effect from sodium nitrite used in cyanide poisoning
10. BLINDNESS — Adverse effect from methanol ingestion
11. PRAZIDOXIME — Regenerates acetylcholinesterase
13. SEROTONIN — Cyproheptadine is used to treat ________ syndrome
17. NALOXONE — Antidote for overdose of heroin
